

# Berge multifunction keypad and joystick

The BERGE Multifunction Keypad and Joystick has been developed to meet the specific needs and demands of the maritime market.

The keypad can be tailored to meet individual functions, color, logo and design requirements. Each key can generate the user's required key codes. Sequenced key codes can also be generated.

## Keypad

The BERGE Multifunction Keypad and Joystick has been developed to meet the specific needs and demands of the maritime market.

The keypad can be tailored to meet individual functions, color, logo and design requirements. Each key can generate the user's required key codes. Sequenced key codes can also be generated on a single key. Multiple profiles can be stored, and changed directly from our keypad making integration a breeze.

## Joystick

The 3 axis analogue push button joystick is Thumb operated, and features Spring Return to Center.

Supports Mouse mode, 4 way, 8 way, Prioritize Vertical, Prioritize Horizontal, Dead Zone, Diagonal Size, Emulation Speed and a broad range of customizations.
